

DuraCor®

HERBICIDE

DuraCor® Herbicide Handling Recommendations

DuraCor® herbicide is a suspension concentrate (SC) formulation that allows for a low and flexible use rate and the ability to mix well with fertilizer. As with all SC formulation types, it is recommended to shake or mix the product prior to application for best results. Below are best management practices for mixing DuraCor herbicide.

	4x1 Gallon	Drum (30 Gallon)	Tote (250 Gallon)	Bulk
BEGINNING of Application Season (BEFORE first application from product container after opening for use)	Shake Well Before Use	Mix for 30 Minutes	Mix for 30 minutes	Recirculate the tank (3 volume turns)
DURING Application Season	Shake Well Before Each Use	Mix for 30 Minutes Per Month	Mix for 30 minutes Per Month	Recirculate the tank (3 volume turns) Per Month
AFTER Application Season	No Mixing Required as Product Will Freeze ~25°F.
