

Floxcor™

FUNGICIDE

Distinct Advantage Over Other Strobilurins

Floxcor™ fungicide provides broad-spectrum control, rapid plant uptake and rainfastness in 15 minutes for a distinct advantage over other strobilurins.

At a Glance

- **Active ingredient:** Fluoxastrobin
- **Signal word:** Caution
- **Trusted chemistry:** FRAC 11 (strobilurin) group fungicide
- **Diseases controlled:** 26
- **Rainfastness:** 15 minutes
- **Labeled for use on most warm- and cool-season turf grasses**
- **Available package sizes:** one pint, half gallon

Floxcor fungicide works quickly to control more than 26 turf diseases, including brown patch, fairy ring and dollar spot. Fluoxastrobin, the active ingredient in Floxcor fungicide, is taken up quickly by working through xylem and translaminar movement, providing a distinct advantage over other strobilurins.

Versatile solution, rapid plant uptake

The rapid plant uptake enables the active ingredient to travel farther than other strobilurins, giving you the advantage over various turf diseases. Rainfast 15 minutes after an application, Floxcor fungicide impedes fungal growth and prevents new infections. Plus, flexible application rates allow you to dial in your disease management program.

Increase control

When paired with Eagle® 20EW specialty fungicide, the combination will effectively control the most common diseases turf professionals face.

For more information on **Floxcor® fungicide**, please contact your local Corteva Agriscience territory manager or call 800-258-3033.

Key diseases controlled

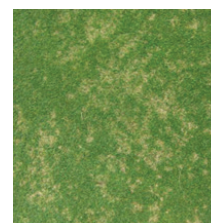

Floxcor fungicide impedes fungal growth and prevents new infections of more than 26 turf diseases, such as:

Anthracnose

Brown Patch

Dollar Spot (light to moderate pressure)

Fairy Ring

Spring Dead Spot

Summer Patch

Use Sites

For use to control diseases on golf courses; lawns and landscapes around residential, institutional, public, commercial and industrial buildings; parks; recreational areas; sod farms and athletic fields. Labeled for use on most warm- and cool-season turf grasses.

Flexible application rates

The application rate for Floxcor fungicide is 8 to 16 ounces per acre (0.18-0.36 fluid ounce per 1,000 sq/ft), allowing you to customize your disease management program.
