

2024 COTTON

UNITED STATES PRODUCT USE GUIDE

Introduction

This 2024 Product Use Guide provides technical information about Corteva Agriscience™ cotton products and sets forth requirements and guidelines for the use of these products. Please read all of the information pertaining to the technology you will be using, including stewardship and related information.

This technical guide is not a pesticide product label. It is intended to provide additional information and to highlight approved uses from certain product labels. Read and follow all precautions and label instructions on any agricultural or pesticide products that you are using.

Not all products described in this Product Use Guide are available in all brands.

Table of Contents

Stewardship Overview	3
Integrated Pest Management	4
The Enlist® weed control system	7
WideStrike® Insect Protection and WideStrike® 3 Insect Protection	13
Management for WideStrike® and WideStrike® 3	14

Stewardship Overview

A Message About Stewardship

Corteva Agriscience is committed to the responsible management of all its seed products.

By accepting delivery of any Corteva Agriscience product, growers are contractually obligated to comply with all laws, regulations, and Corteva Agriscience stewardship requirements described in Product Use Guide(s) and any product-specific stewardship requirements, as each may be amended from time to time by Corteva Agriscience.

Proper stewardship of Corteva Agriscience products is beneficial to growers and other stakeholders, including enabling continued grower access to Corteva leading germplasm and biotechnology traits in seed products and helping to enhance grower productivity and profitability. Proper stewardship also promotes responsible use of these products, such as mitigating potential resistance development to enhance long-term durability of Corteva Agriscience technologies. When combined with best management practices, Corteva Agriscience products provide options for growers and their customers. To help enable grower success and protect Corteva technologies, growers must agree and understand the stewardship requirements, such as potential grain use restrictions, including but not limited to:

- Sign and comply with the Corteva Agriscience Technology Use Agreement (TUA), which may be amended from time to time. Signing the TUA permits access to the Corteva Agriscience germplasm and the biotech trait technologies in Corteva Agriscience seed products.
- Follow Stewardship requirements detailed in Product Use Guide(s), (www.corteva.us/Resources/trait-stewardship.html) and on product-specific labels.
- Read and follow all seed, pesticide, or other product labels and information.
- Implement appropriate product-specific Insect Resistance Management (IRM) and/or Herbicide Resistance Management (HRM) practices, as required by Corteva Agriscience and the U.S. Environmental Protection Agency (EPA). Following IRM and HRM requirements helps limit development of insect and herbicide resistance and helps to maintain the long-term durability of these technologies.
- Use of Corteva Agriscience seed products solely for producing a single commercial crop encourages the development of better, high yield potential germplasm and additional technologies and innovations, further improving agricultural productivity.
- Growers are required to discuss trait acceptance and grain purchasing policy with the grain purchaser or grain handler prior to the delivery and sale of crop products (e.g., grain or other plant material containing biotech traits) and only deliver grain to a purchaser or grain handler that agrees grain and by-products will be marketed in markets where such products are authorized for the specific use. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.
- Follow any additional stewardship requirements that Corteva Agriscience deems necessary for a particular product (e.g., grain or feed use or geographical planting restrictions, or use of an authorized herbicide).
- Any forward-looking statements made by Corteva Agriscience related to regulatory approval timelines by their nature address matters that are, to different degrees, uncertain. Any forward-looking statements of anticipated regulatory authorization timelines are not guarantees of government agency action and are based on certain assumptions and expectations of future events that may not be realized.
- Contact your local sales professional for more information.

By using Corteva Agriscience products, growers further understand and

agree that (1) all crops and materials containing biotech traits may only be (a) exported, transferred or moved to or (b) used, processed, or transferred in jurisdictions where all necessary regulatory authorizations have been granted for those crops and materials for such activities, (2) it may be unlawful to export, transfer, or move materials containing biotech traits across borders into jurisdictions where their import and use is not authorized, including through a third party, and (3) products authorized in the United States may or may not be authorized in all global markets; therefore, the combination of these traits and the grain and certain byproducts (oil, meal, fiber, etc.) from these products may not be authorized in some markets.

Our Commitment to Excellence Through Stewardship®

www.excellencethroughstewardship.org

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products.

In line with these guidelines, our product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased.

For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Integrated Pest Management

As a grower, integrated pest management (IPM), provides you the opportunity to tailor how you manage weeds, insects, and diseases in your fields. IPM integrates responsible use of traits, crop protection products, and cultural management practices to:

- Prevent the buildup of pests through starting with a clean field and rotating crops and traits.
- Use seed products, planting technology, and seedling rates that are appropriate for a given crop in a particular geographic area.
- Scout: Monitor for pest populations throughout the growing season to determine if treatment is necessary.
- Intervene when required, using combination of approaches to manage the pest population.
- Use appropriate maturity products and harvest schedules, destroying crop residue promptly.
- Minimize over-wintering of pests through soil management practices.
- Use crop rotation, including products with different traits, to delay onset of resistance.
- Use multiple modes of action in crop protection products to reduce likelihood of resistance development.

Monitoring Insect Pests

It is important to carefully monitor fields for all pests to determine whether treatment with a pest control method is needed. Scouting techniques and remedial pest control treatments should address the fact that larvae must hatch and feed before incorporated plant protection technologies have an effect on the pests. Scouting should be performed regularly, particularly after periods of heavy or sustained egg laying (especially during bloom), to determine whether larval survival is significant in a particular field.

Weed Management

Herbicide tolerance technology provides convenient, effective, and economical weed control in crops. However, intensive long term use of any single herbicide mode of action can lead to the development of weeds resistant to that mode of action. Planting crops that enable use of multiple herbicide modes of actions as part of an IPM program can provide consistent, effective weed control while reducing the potential for resistance development. Talk to your local sales professional about the herbicide tolerance in your crops.

Corteva Agriscience supports the Take Action effort. Take Action is an industry-wide partnership between university scientists, major crop protection providers and organizations representing corn, cotton, sorghum, soybean and wheat growers to help them manage pests such as herbicide-resistant weeds. The Take Action effort encourages you to develop a proactive strategy to manage herbicide-resistant weeds that incorporates a diverse set of controls. To find out more about how you can take action, visit www.iwilltakeaction.com, or contact your local extension office.

CORTEVA AGRISCIENCE DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING THE USE OF PRODUCTS MANUFACTURED OR MARKETED BY OTHER COMPANIES INCLUDING BUT NOT LIMITED TO THOSE THAT ARE LABELED FOR USE IN CROP(S) CONTAINING CORTEVA TECHNOLOGY. CORTEVA AGRISCIENCE AND ITS AFFILIATED COMPANIES SPECIFICALLY DISCLAIMS ALL RESPONSIBILITY FOR THE USE OF THESE PRODUCTS IN CROPS CONTAINING CORTEVA TECHNOLOGY. ALL QUESTIONS AND COMPLAINTS ARISING FROM THE USE OF PRODUCTS MANUFACTURED OR MARKETED BY OTHER COMPANIES, OR THE IMPACT TO CORTEVA TECHNOLOGY FROM THE USE OF SUCH PRODUCTS, SHOULD BE DIRECTED TO THOSE COMPANIES. IT IS THE GROWER'S OBLIGATION TO READ AND FOLLOW PRODUCT LABEL REQUIREMENTS. CORTEVA AND ITS AFFILIATED COMPANIES ARE NOT RESPONSIBLE FOR ANY MISUSE OR MISAPPLICATION OF PRODUCTS, INCLUDING PESTICIDES, BY A GROWER.

Additional stewardship information may be found at www.corteva.us or consult your local sales professional. You may also contact Corteva Agriscience at: 1-800-258-3033.

Herbicide Groups

The Weed Science Society of America categorizes herbicides into different groups based on their mode of action. If a given weed population has plants resistant to a herbicide in one group, that weed population may not be able to be effectively managed using only other herbicides in that group. However, that weed population may be able to be managed with a different herbicide from a different herbicide group, whether alone or in combination with a herbicide from that same group, or by using other weed management practices, such as mechanical practices. Note that herbicide classification may not, in all circumstances, address weeds resistant to particular herbicides. Consult your local sales professional, state cooperative extension service, professional consultants, or other qualified individuals to discuss appropriate actions to address specific weeds that appear to show resistance to a particular herbicide.

Roundup Ready Technology Endangered Species Initiative Requirement

Before making an application of any glyphosate-based herbicide product, licensed growers of crops containing Roundup Ready® Technology must access the website pre-serve.org to determine whether any mitigation requirements apply to the planned application to those crops, and must follow all applicable requirements. The mitigation measures described on the website are appropriate for all applications of any glyphosate-based herbicide to all crop lands. Growers making ground or air applications to crop land with a use rate of less than 3.5 lbs or 0.7 lbs of glyphosate a.e./A, respectively, or glyphosate applied in Alaska, Oklahoma, Pennsylvania or South Dakota are not required to access the website. If a grower does not have web access, the seed dealer can access the website on behalf of the grower to determine the applicable requirements, or the grower can call **1-800-332-3111** for assistance.

Integrated Weed Management (IWM)

There is no "one size fits all" to any weed management program. We recommend inquiring the advice of your local agronomist or technical advisor to develop a local integrated weed management solution that utilizes widely accepted best management practice (BMPs) concepts.

Maintain clean fields by using the following best practices:

1) START CLEAN

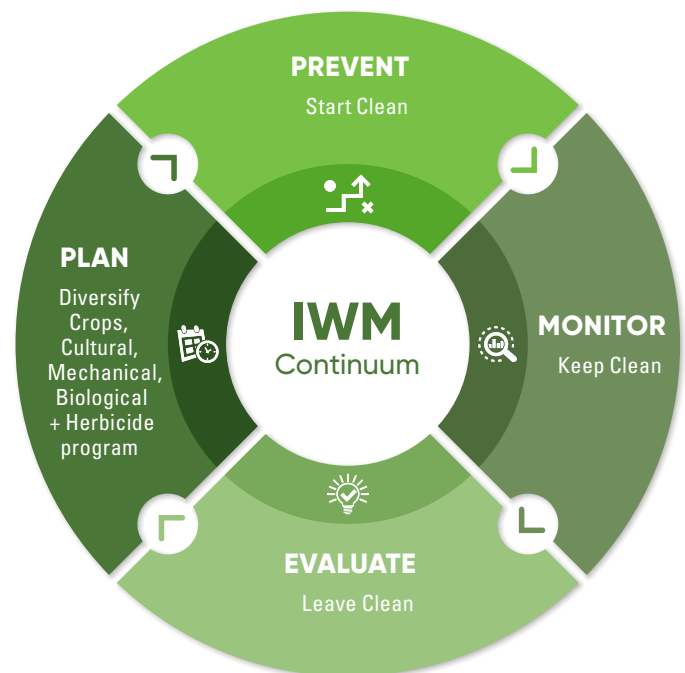

- Scout fields before and after use of any management tactic
- Keep accurate records of your management tactics used and their results, including any indications of changes in response with difficult to control weeds
- Control weeds early, generally before exceeding 15 cm in height

2) KEEP CLEAN

- Use correct herbicide(s) for the weed spectrum, with proper rates and timing
- Rotate modes of action ensuring herbicides used provide effective control of the target weed species present in your field.
- Incorporate sound agronomic practices that improve your crop's ability to compete effectively with weeds

3) LEAVE CLEAN

- Control weed escapes that can occur before or after harvest
- Thoroughly clean equipment to avoid field to field weed spread

Herbicide Resistant Weeds

Weed resistance is a serious problem that all of us need to consider when planning our integrated weed management program. Herbicide resistance is the ability of a weed biotype to survive a herbicide application, where under normal circumstances that herbicide applied at the recommended rate would kill the weed. The Herbicide Resistance Action Committee (HRAC) offers additional assistance in confirming herbicide resistance on their website hracglobal.com. Understanding risk for herbicide resistance is important. Table 1 below will help assess the risk of resistance developing in each field.

Grower awareness and proactive management of herbicide resistant weeds are part of a successful weed control program. Suspected herbicide resistance is defined as the situation where the following three indicators occur at a site or location:

- Failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds.

- A spreading patch of non-controlled plants of a particular weed species; and
- Surviving plants mixed with controlled individuals of the same species.

With confirmed herbicide resistance, other weed management practices should be employed to control and prevent the spread of a population of herbicide resistant weeds. Your Corteva Agriscience sales professional can provide recommendations for a particular herbicide resistant weed. Report any incident of non-performance against a specific weed of the herbicide used to your Corteva sales professional, local retailer, or county extension agent. Corteva Agriscience herbicide product labels include weed resistance management language and approved labels, including supplemental labeling, must be in possession of the user at the time of pesticide application and can be obtained by contacting your state's pesticide lead agency or the website www.cdms.net.

Table 1. Assessment of the Risk of Resistance Development per Target Species (The major risk factors within a cropping system)

Management Option	Risk of Resistance		
	Low	Moderate	High
Herbicide mix or MOA rotation in cropping system	≥3 MOAs	2 MOAs	1 MOA
Integrated Weed Control	Cultural, Mechanical, & Chemical	Cultural & Chemical	Chemical only
Use of same MOA per season	Once	More than once	Many times
Cropping system	Full Rotation	Limited rotation	No rotation
Resistance status to MOA	Unknown	Limited	Common
Weed infestation	Low	Moderate	High
Control in last 3 years	Good	Declining	Poor

The Enlist® weed control system

The Enlist® weed control system is here for the long haul, and here's why: It's based in science and backed by stewardship. This unrivaled system starts with Enlist® herbicide-tolerant traits that enable the use of our powerful Enlist® herbicides. The Enlist® Ahead management resource provides tools and training to make sure you get the most from the system.

This reference guide is not intended as a substitute for the product label for product(s) referenced herein. Always read and follow all label directions and precautions for use when using any pesticide alone or in tank-mix combination. Failure to follow the label, including any supplemental label precautions, is considered a misuse under federal law.

HERBICIDE TOLERANCES	
ENLIST® W3FE COTTON	ENLIST® W3E1 COTTON
2,4-D choline	2,4-D choline
Glufosinate	Glufosinate
Glyphosate	

To find product labels and additional resources about the Enlist® weed control system, visit Enlist.com or scan the QR code:

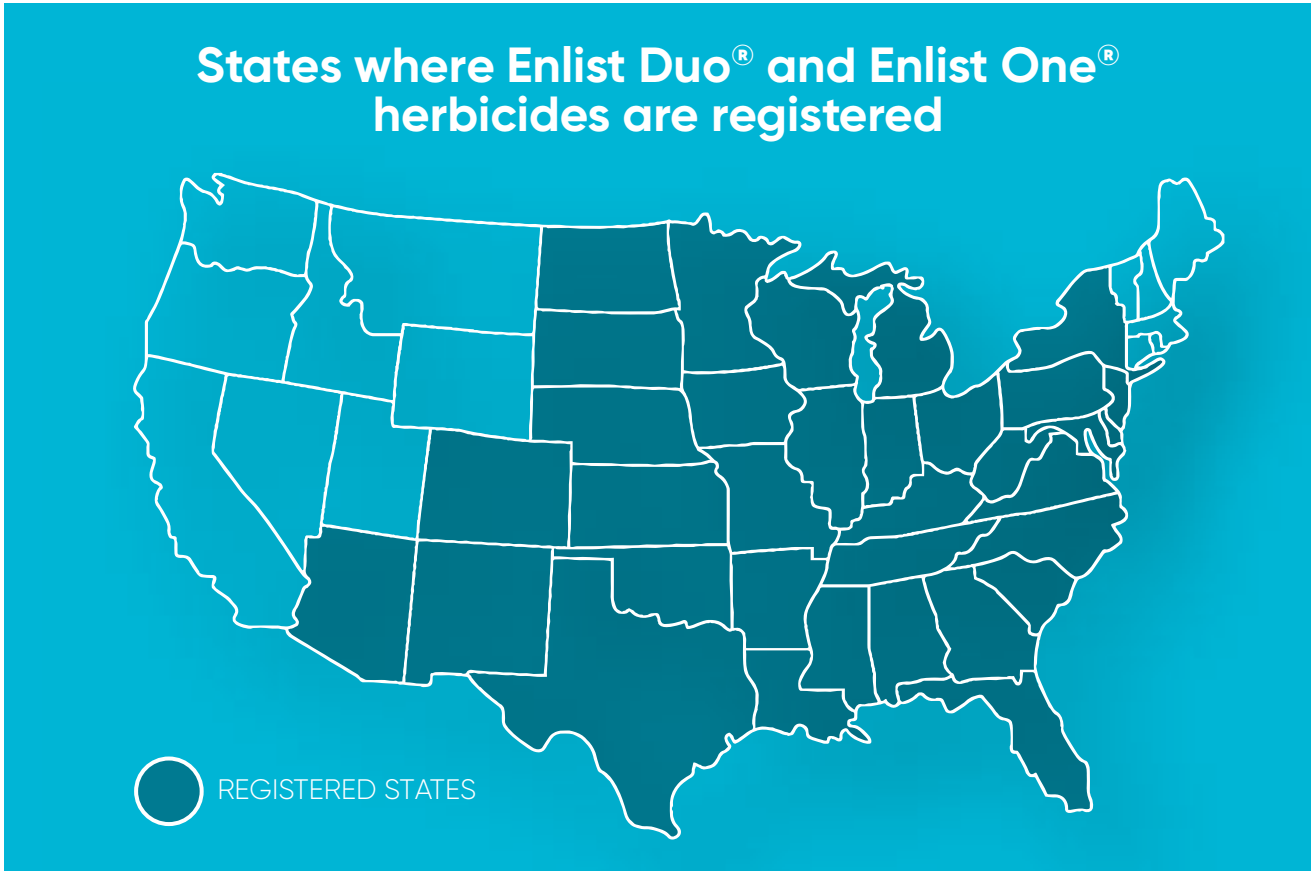

Straight-goods 2,4-D choline with additional tank-mix flexibility

Convenient proprietary blend of 2,4-D choline and glyphosate

Enlist One® herbicide is a straight-goods 2,4-D choline product with Colex-D® technology that provides additional tank-mix flexibility with products listed on EnlistTankMix.com, such as Liberty® herbicide, glyphosate herbicides, residual herbicides, fungicides and insecticides. Enlist Duo® herbicide with Colex-D technology combines the proven performance of 2,4-D choline and glyphosate in a convenient, proprietary blend.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo herbicide. To obtain "Bulletins," consult www.epa.gov/espp/, call 844-447-3813, or email espp@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo herbicide are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at TraitStewardship.com. Always read and follow label directions.

Get the best results with the Enlist® Ahead management resource

Enlist® Ahead is a management resource that helps you get the best results from the Enlist® weed control system while protecting the herbicide-tolerant technology for the future, helping you:

- Make on-target applications on your crops.
- Select and use different sites of action in the same growing season.
- Mitigate herbicide resistance and prevent new resistance development in your fields.

As part of Enlist Ahead, you can:

- Download the Enlist® Ahead app for readily accessible information on your iOS device.
- Visit Enlist.com for an overview of the Enlist weed control system, an online training module and other technical information.
- Visit EnlistTankMix.com for qualified tank-mix partner listings.
- Get support from your local Corteva Agriscience crop protection territory manager and Enlist® field specialist.

Following the best practices presented in Enlist Ahead will help you achieve optimum results and sustain the long-term performance of the Enlist® weed control system. Growers of Enlist® crops must read and follow the refuge and Insect Resistance Management (IRM) requirements in Product Use Guides found at TraitStewardship.com.

Take control of tough weeds with Enlist Duo® and Enlist One® herbicides

Use Enlist® herbicides as the cornerstone of a season-long program approach for weed management on crops with Enlist® traits.

Enlist® herbicides control tough and herbicide-resistant weeds, including, but not limited to:

- ✔ Common ragweed
- ✔ Giant ragweed
- ✔ Lambsquarters
- ✔ Velvetleaf
- ✔ Marestail³
- ✔ Morningglory
- ✔ Waterhemp³
- ✔ Pigweed³
(including Palmer amaranth³)

For a full listing of 90+ weeds controlled, reference the labels for Enlist Duo® and Enlist One® herbicides.

On-target characteristics of 2,4-D choline with Colex-D® technology

How Enlist herbicides differ from 2,4-D ester, amine and other traditional formulations:

- Near-zero volatility
 - 2,4-D choline is 96% less volatile than 2,4-D ester.
 - 2,4-D choline is 88% less volatile than 2,4-D amine.
- Reduced physical drift potential
- Better handling characteristics

Use the right application rate

Apply 4.75 pints of Enlist Duo® herbicide or 2 pints of Enlist One® herbicide per acre to young, actively growing weeds, according to the product label directions.⁴ It's essential to spray when weeds are 6 inches tall or less and to use the full herbicide rates. These practices help ensure best weed management and help prevent and mitigate the development of herbicide resistance.

³ May require a broader management plan including timely application and use of a soil residual herbicide.

⁴ Always read and follow the product label as well as state and local requirements.

Key practices to remember:

- Use full labeled rates for best weed management.
- Spray when weeds are young, 6 inches tall or less.
- Spray when weeds are actively growing.

The product labels for Enlist Duo® and Enlist One® herbicides also contain important information about application equipment requirements, restrictions and precautions, and weed management.

POSTEMERGENCE APPLICATION RATE

Enlist Duo® herbicide	4.75 pt./A
Enlist One® herbicide	2 pt./A

Postemergence passes on Enlist® acres

Enlist® traits enable multiple options for postemergence herbicide sprays, allowing design of a program approach to fit each acre. Consider your weed pressure and agronomic situation when assessing which Enlist® herbicide and tank-mix partners work best.

ENLIST DUO® HERBICIDE	ENLIST ONE® HERBICIDE + LIBERTY® HERBICIDE	ENLIST ONE® HERBICIDE + GLYPHOSATE
Enlist Duo herbicide @ 4.75 pt./A	Enlist One herbicide @ 2 pt./A	Enlist One herbicide @ 2 pt./A
Ammonium sulfate (AMS) as needed	<ul style="list-style-type: none"> • Liberty herbicide @ 2 pt./A • Liberty herbicide is the preferred glufosinate of the Enlist® weed control system. • 1.5 to 3 lb./A of AMS 	<ul style="list-style-type: none"> • Glyphosate @ high rate • AMS as needed

Check EnlistTankMix.com for all qualified AMS and qualified glyphosate products.⁵

⁵ Products listed on EnlistTankMix.com have not been tested for crop response or physical tank-mix compatibility. Listing on website does not imply agronomic recommendation or endorsement of use.

⁶ Talk with your retailer for recommendations on preemergence and residual herbicides for your farm.

Use Enlist® herbicides as the cornerstone of your program approach

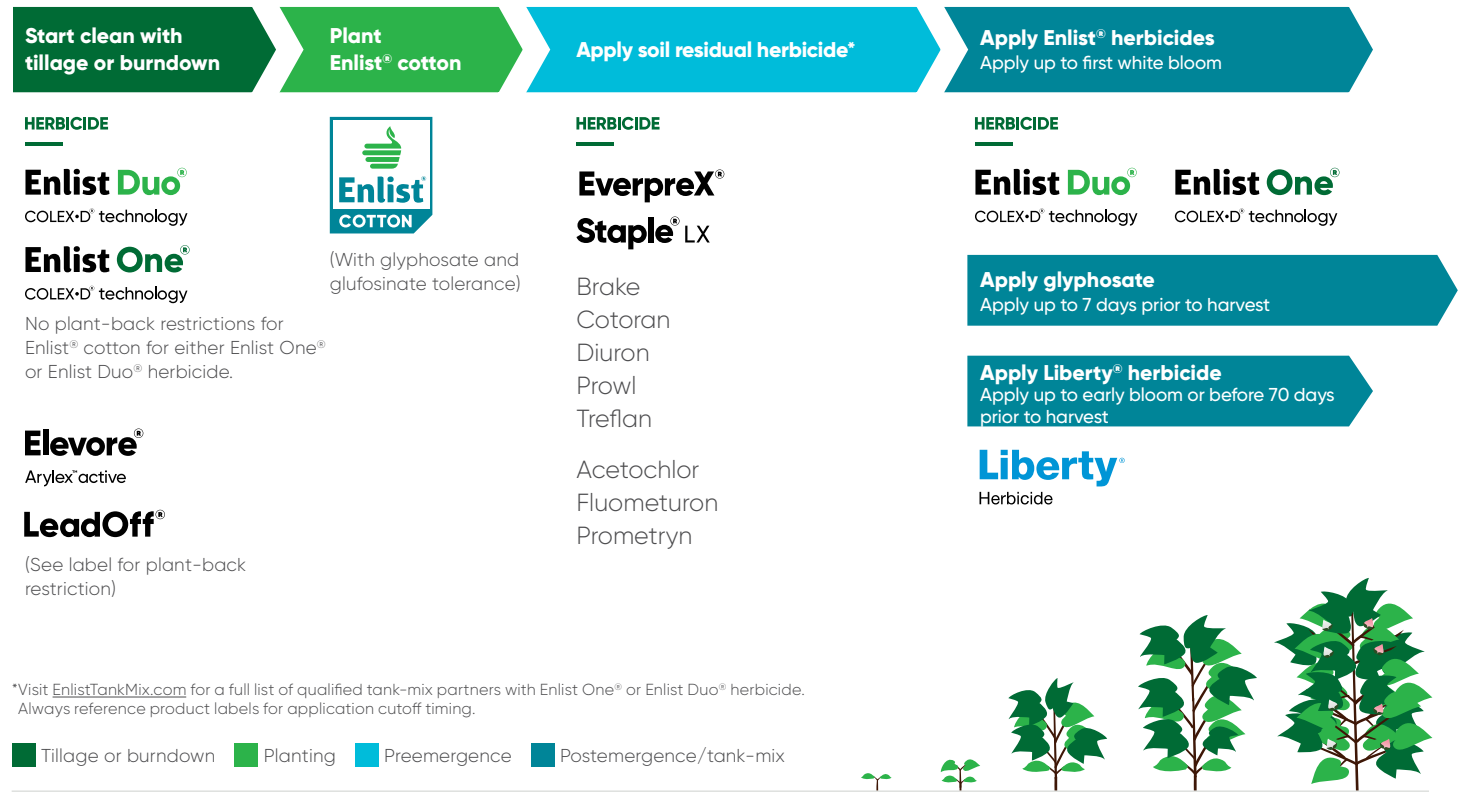

You'll have the greatest success in weed management if you use an Enlist® herbicide as part of a program approach for weed control in Enlist® crops. This improves weed control, reduces weed competition during key stages of crop growth and helps manage herbicide resistance.

Key practices to remember:

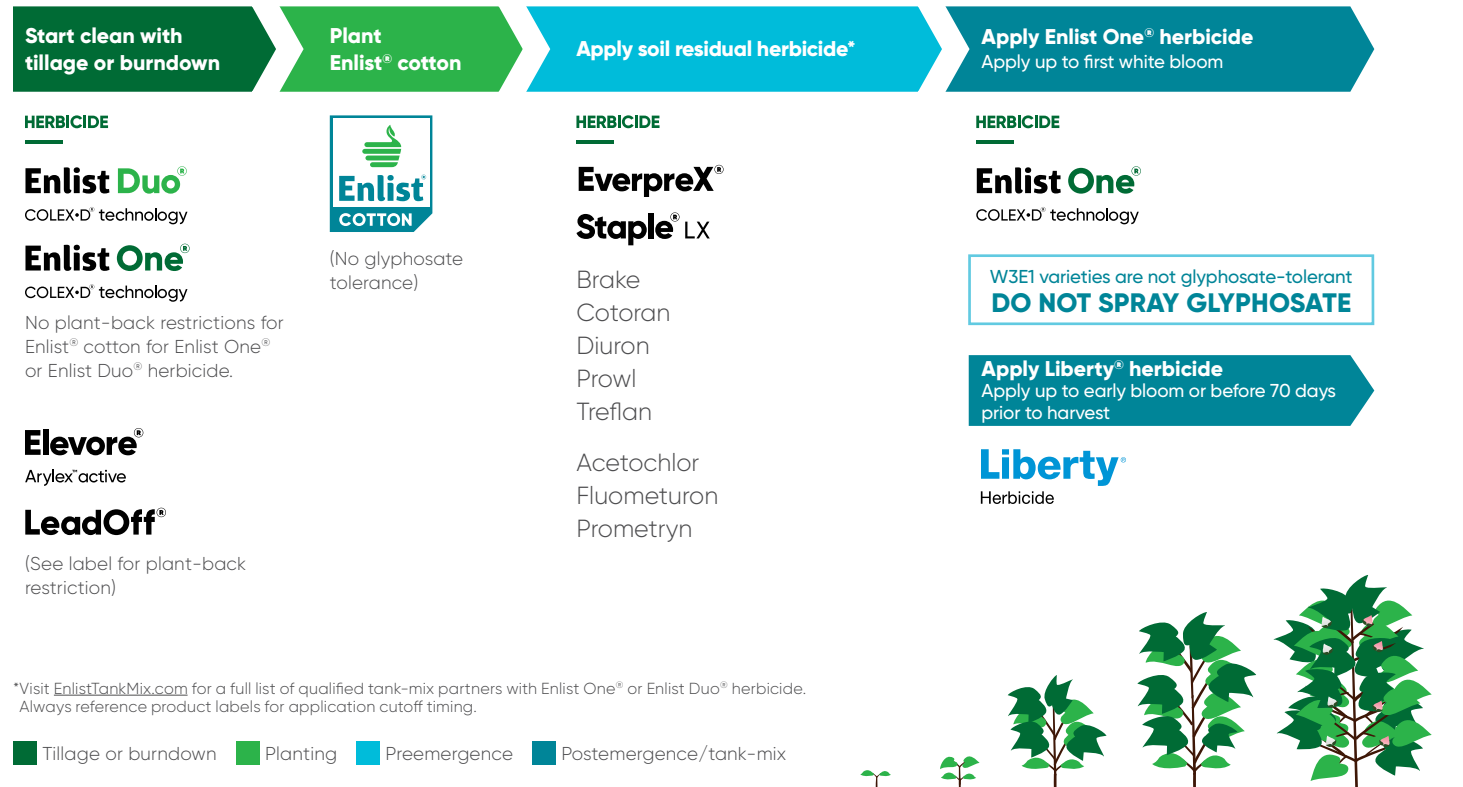

- Enlist® herbicides can be used in burndown, preemergence and postemergence passes on crops with the Enlist® trait.
- Enlist herbicides are rainfast within four hours.
- Up to three applications may be made per season (2 pt./A per application for Enlist One® herbicide or 4.75 pt./A per application for Enlist Duo® herbicide, where consistent with runoff management practices).
 - One application at burndown or preemergence
 - Up to two applications postemergence, at least 12 days apart
- Always include a true broad-spectrum soil residual herbicide⁶ in your weed management plan.
- Consider using a layered residual, such as a Group 15 herbicide (e.g., S-metolachlor, pyracasulfone, acetochlor), in your post passes for longer-lasting weed control.

Cotton W3FE program approach

Cotton W3E1 program approach

What to know about Enlist® cotton

Enlist® cotton provides improved weed control with exceptionally effective Enlist® herbicides. The trait allows you to apply herbicides featuring multiple sites of action for even better control of glyphosate-resistant weeds. When you plant any Enlist® W3FE cotton variety, you get crop tolerance to 2,4-D choline, glufosinate and glyphosate herbicides. Enlist W3FE cotton provides crop tolerance that enables you to use Enlist Duo® or Enlist One® herbicide as part of a program approach for weed control.

Enlist® W3E1 cotton is a nonglyphosate-traited offering, allowing farmers to use Enlist One herbicide for more flexibility in a program approach, and is more effective than glufosinate alone.

HERBICIDE TOLERANCE OF ENLIST® W3FE COTTON VARIETIES	HERBICIDE TOLERANCE OF ENLIST® W3E1 COTTON VARIETIES
TRAIT STACK: WIDESTRIKE® 3 INSECT PROTECTION, ROUNDUP READY® FLEX, ENLIST®	TRAIT STACK: WIDESTRIKE® 3 INSECT PROTECTION, ENLIST®
2,4-D CHOLINE	2,4-D
GLUFOSINATE	GLUFOSINATE
GLYPHOSATE	

Stalk destruction for Enlist cotton

All Enlist® cotton varieties are tolerant to 2,4-D choline. Therefore, stalk destruction for Enlist cotton may differ from traditional chemical stalk destruction procedures. Herbicide active ingredients other than 2,4-D must be used for stalk destruction for Enlist cotton. Recommended options include dicamba, Duplosan® and thidiazuron with crop oil concentrate. For full details, see Enlist.com or your PhytoGen or Corteva Agriscience representative.

For more information on the Boll Weevil Eradication Program and complete requirements, visit the Texas Department of Agriculture website: TexasAgriculture.gov/RegulatoryPrograms/CottonStalkDestruction

When growing Enlist cotton near conventional cotton and/or cotton without the Enlist® trait (coexistence)

Cotton is a naturally cross-pollinated crop, and a small amount of cotton pollen movement to nearby fields is not uncommon. You can reduce undesired pollen movement with a few simple steps:

- Maintain a noncotton buffer between fields containing crops with biotechnology traits and conventional crop fields.
- Consider field location relative to the field containing biotech traits: Cotton fields oriented upwind will have less cross-pollination compared with fields located downwind.
- Discuss your plans with relevant neighbors in advance.

Use only herbicides authorized for application with Enlist cotton

Enlist Duo and Enlist One herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist cotton. Following burndown, use of unauthorized 2,4-D products that are not Enlist herbicides on Enlist cotton, or other crops with the Enlist® trait, is not permitted and could lead to loss of access to Enlist® technology.

WideStrike® Insect Protection Trait and WideStrike® 3 Insect Protection Trait

Not all products described in this Product Use Guide are available in all brands.

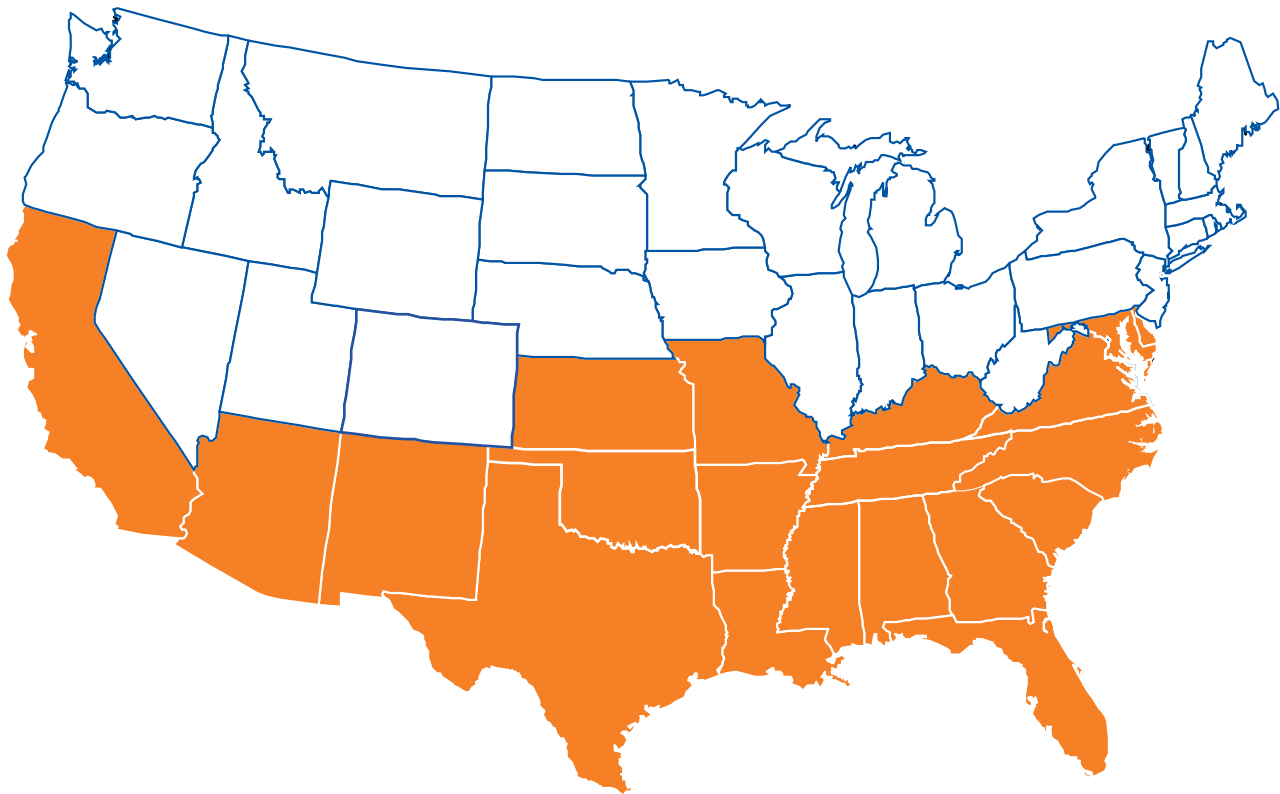

This Product Use Guide sets forth the requirements for growing cotton containing WideStrike® insect protection trait and WideStrike® 3 insect protection trait, including Insect Resistance Management (IRM) practices.

Cotton containing WideStrike insect protection trait and WideStrike 3 insect protection trait is protected under one or more U.S. patents. You must have a valid, executed Corteva Agriscience Technology Use Agreement (TUA) on file with Corteva Agriscience to legally obtain, plant and grow varieties that contain *Bacillus thuringiensis* (*Bt*) cotton technology from Corteva Agriscience. Failure to comply

with the terms of the Technology Use Agreement or the Product Use Guide could result in your forfeiting the privilege to grow Corteva Agriscience *Bt* cotton and potential legal liability. You must communicate all applicable requirements and restrictions on your *Bt* cotton to all persons growing, possessing or taking an interest in your *Bt* cotton.

A Technology Use Agreement may be signed electronically online at www.agcelerate.com. For additional information, visit www.traitstewardship.com, call 1-800-258-3033 or contact your seed provider.

Refuge Requirements for WideStrike Insect Protection Trait and WideStrike 3 Insect Protection Trait

■ **1 No Structured refuge required for WideStrike Insect Protection Trait and WideStrike 3 Insect Protection Trait**

¹ Check with your PhytoGen sales representative about the status/requirements of any pink bollworm eradication program in your area.

Restricted Planting Locations

- No planting of WideStrike and WideStrike 3 insect protection trait is permitted in the following counties in Florida: Charlotte, Collier, Lee, Manatee, Miami-Dade, Monroe (including Florida Keys), Palm Beach, Pinellas, and Sarasota counties.
- Commercial culture of *Bt* cotton is prohibited in Hawaii, Puerto Rico and the U.S. Virgin Islands.
- Cotton growers in Florida should consult Florida State Department of Agriculture Regulations that restrict the planting of commercial cotton in certain southern counties.

Management for WideStrike® Insect Protection Trait and WideStrike® 3 Insect Protection Trait

WideStrike® insect protection trait and WideStrike® 3 insect protection trait contain *Bt* proteins that provide protection from feeding by several lepidopteran pests, including tobacco budworm and bollworm. Under heavy pest pressure, feeding damage may occur to the *Bt* cotton plants. WideStrike and WideStrike 3 insect protection trait fields should be regularly scouted for pest feeding, and insecticide treatments should be used if local economic thresholds are reached.

Various factors, including pest pressure, reduced susceptibility, and insect resistance in some pest populations may affect efficacy of certain cotton technology products in some regions.

Insect Resistance Management

Insect Resistance Management (IRM) is mandated by the U.S. Environmental Protection Agency (EPA) and is the responsibility of each person growing and using *Bt* cotton protection technology. Properly managing *Bt* cotton technology is essential to preserving it as a useful crop protection tool for years to come. Failure to implement IRM plans may lead to adaptation by the target pest populations to the *Bt* insecticidal proteins and loss of efficacy of the product.

A key element in IRM is the use of a refuge. Within this refuge, certain target insects survive without exposure to *Bt* insecticidal proteins. This ensures

sufficient target insects susceptible to *Bt* insecticidal proteins are nearby to mate with any rare insects naturally resistant to *Bt* proteins that may emerge from your *Bt* cotton fields. Susceptibility to *Bt* proteins is then passed on to their offspring.

Natural refuges provided by host crops and wild plants other than cotton are currently sufficient to manage resistance in cotton growing regions.

Corteva Agriscience requires customers to monitor *Bt* fields for unexpected levels of insect damage and report any high level of suspected insect damage to a sales representative for further investigation.

Herbicide Tolerance

Some *Bt* cotton varieties are available with the Enlist® trait and/or Roundup Ready® FLEX cotton technology herbicide-tolerant trait, making them tolerant to over-the-top applications of Enlist One®, glufosinate ammonium and/or Enlist Duo® and glyphosate herbicides.

Verify the weed control system before making over-the-top herbicide applications. Always read and follow label directions. Use of a herbicide over the top of a cotton variety that does not contain the tolerant trait for that herbicide used will cause crop damage.

PRODUCT USE STATEMENT: WideStrike® 3 insect protection protects cotton plants from certain lepidopteran insect pests including cotton bollworm, tobacco budworm, pink bollworm, beet armyworm, fall armyworm, southern armyworm, soybean looper, cabbage looper, black cutworm, citrus peelminer, cotton leaf perforator, European corn borer, omnivorous leafroller, and saltmarsh caterpillars. Cotton containing WideStrike 3 Insect Protection produces the Cry1Ac, Cry 1F, and VIP3Aa19 Bacillus thuringiensis (Bt) proteins. EPA Reg. No. 68467-19.

Do NOT plant WideStrike 3 cotton in the following counties in Florida: Charlotte, Collier, Lee, Manatee, Miami-Dade, Monroe (including Florida Keys), Palm Beach, Pinellas, and Sarasota counties or in Hawaii, Puerto Rico or the U.S. Virgin Islands.

YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING AND FOLLOW INSECT RESISTANCE MANAGEMENT (IRM) REQUIREMENTS.

WideStrike® 3 cotton varieties have tolerance to glufosinate through the expression of the pat gene which detoxifies glufosinate ammonium in the plant. Apply glufosinate herbicide in accordance with the product label.

Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

PATENT STATEMENT: The technology incorporated into these seeds is protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of these seeds includes a limited license to produce a single crop in the United States (or other applicable country). Insect control technology incorporated into these seeds is commercialized under a license from Syngenta Crop Protection AG and Syngenta Seeds, Inc. The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited.

PRODUCT USE STATEMENT: WideStrike® insect protection protects cotton plants from certain lepidopteran insect pests including tobacco budworm, pink bollworm, beet armyworm, fall armyworm, southern armyworm, soybean looper, cabbage looper, black cutworm, citrus peelminer, cotton leaf perforator, European corn borer, omnivorous leafroller, and saltmarsh caterpillars. Cotton containing WideStrike insect protection produces the Cry1Ac and Cry1F Bacillus thuringiensis (Bt) proteins. EPA Reg. No. 68467-3.

Do NOT plant WideStrike cotton in the following counties in Florida: Charlotte, Collier, Lee, Manatee, Miami-Dade, Monroe (including Florida Keys), Palm Beach, Pinellas, and Sarasota counties or in Hawaii, Puerto Rico or the U.S. Virgin Islands.

YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING AND FOLLOW INSECT RESISTANCE MANAGEMENT (IRM) REQUIREMENTS.

WideStrike® cotton varieties have tolerance to glufosinate through the expression of the pat gene which detoxifies glufosinate ammonium in the plant. Apply glufosinate herbicide in accordance with the product label.

Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

PATENT STATEMENT: The technology incorporated into these seeds is protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of these seeds includes a limited license to produce a single crop in the United States (or other applicable country). The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited.

PRODUCT USE STATEMENT: Enlist® cotton (DAS-81910-7) provides crop safety for over-the-top applications of glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist cotton.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING AND FOLLOW HERBICIDE RESISTANCE MANAGEMENT (HRM) REQUIREMENTS.

PATENT STATEMENT: The technology incorporated into these seeds is protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of these seeds includes a limited license to produce a single crop in the United States (or other applicable country). The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited.

If you observe unexpected target pest feeding damage to your fields planted with WideStrike® Insect Protection or WideStrike 3 Insect Protection, you should immediately contact your seed provider or sales representative for further investigation.

Intellectual Property Protection

Corteva Agriscience has a long history of investing in intellectual property to provide growers with high performing varieties and industry leading services. Our continued commitment to product research results in Corteva Agriscience products that consistently deliver high yield potential to help make you more profitable. Corteva Agriscience uses patents and Plant Variety Protection (PVP) laws to protect our investment in patented germplasm, native and transgenic traits, and breeding technologies. PVP laws give breeders exclusive control over plant varieties for up to 20 years, enabling Corteva Agriscience to bring new products to the marketplace supported by improved technology.

It is important to note that Corteva Agriscience product offerings, even if not biotech, can carry multiple types of intellectual property protection, such as patented genetics, patented breeding technologies, plant variety protection, patented transgenic traits, and patented native traits, including through the terms and conditions of use found in the Corteva Agriscience TUA.

The purchase of any Corteva Agriscience variety or trait is done so under license with certain limitations. By using the seed supplied in connection with a Corteva Agriscience Technology Use Agreement, you agree to the fact that the seed – and technology within that seed – includes subject matter owned by Corteva Agriscience, or licensed from a third party, that is protected under U.S. intellectual property laws. **Under this contract, you agree to a single-commercial planting of the seed and agree to not bin run or save your seed.**

Coexistence

For decades, multiple agricultural systems have successfully coexisted in the United States and around the world, from initial production through supply chains to the ultimate end users. Over time, management practices to facilitate these different agricultural systems have developed and have been continuously improved so that high purity and high quality seed and grain is available to help growers, handlers, and end-users maximize opportunities and take full advantage of the wide variety of technologies available to each. One example of successful coexistence is the production of similar commodities in close proximity, such as field corn, sweet corn, white corn, and popcorn. Coexistence strategies should be designed to meet market requirements using science-based industry standards and management practices, and should be flexible to facilitate diverse options and choice for growers and the food and feed supply chain. This flexibility also should include the ability of coexistence strategies to be modified as changes in products, markets, or practices take place. The on-going success of coexistence has depended upon cooperation, communication, flexibility, and mutual respect for each cropping system among the entire value chain. Over the years, growers have adapted to changes and innovation in agriculture by using new farm management practices, new technologies, and other appropriate practices and can continue to do so into the future.

It is therefore incumbent on all growers to consider and implement management practices to satisfy the relevant marketing and stewardship practices required by the desired end market. By choosing to grow any crop, growers are inherently agreeing to use practices appropriate to ensure the integrity and marketability of those crops for the intended market and that suitable management and stewardship practices are being implemented, considering each neighbors' farm management. This is true regardless of the particular market being served, whether it is specialty crops,

Why is a TUA required?

- A TUA is required for the purchase of any Corteva Agriscience seed and technologies - all crops, biotech and non-biotech. The TUA serves as an agreement between the customer and Corteva Agriscience and confirms that the customer understands and agrees to follow all license terms, stewardship and applicable legal responsibilities related to their seed products.
- Even though some products do not contain biotech traits, the TUA protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how and patents.
- The TUA grants a limited license for the grower to use/plant Corteva Agriscience seed containing Corteva Agriscience sourced technologies (including germplasm, non-biotech traits, and biotech traits) and produce a single commercial grain crop.
- The TUA requires growers to use and follow the applicable product use guide and labels (seed and herbicide). The TUA prohibits certain activities such as saving seed or use of unauthorized herbicides, including on Enlist® or glyphosate tolerant crops (where applicable).

By abiding by your Corteva Agriscience Technology Use Agreement, you are helping Corteva Agriscience continue to invest in advances in genetics and technology that bring forward new research discoveries and agreeing to follow appropriate product stewardship. These discoveries ultimately help growers increase production and meet new pest and production challenges now and in the future.

identity-preserved crops, organically-produced crops, conventionally produced crops or crops with biotech traits.

For products receiving premiums, the grower is producing a crop supported by a special market price, and therefore assumes responsibility for meeting any applicable market specifications to receive the applicable premium price from that market. Likewise, for products containing biotech traits that may not yet be approved in certain export markets or have special considerations related to production practices (e.g., herbicide application, specialty characteristics), the grower assumes responsibility for the stewardship conditions and implementation related to use of such technologies. Even though the ultimate responsibility is on the grower producing a crop for a particular market to implement appropriate stewardship practices and requirements, including those communicated by a seed provider, it is also each grower's responsibility to communicate with and be aware of the planting intentions of his or her neighbors to gauge the need for any appropriate management and coexistence practices. By communicating what is being grown on neighboring fields and the potential implications of those crops on each growers' management decisions, growers can utilize some of the following coexistence considerations to limit potential conflicts, while acknowledging the generally recognized and accepted occurrence of the movement of incidental amounts of pollen:

- What is the crop biology and what are the product characteristics, specifically considering whether or not the crop is self-pollinating or cross-pollinating;
- What options exist to arrange or select planting locations and fields to help minimize the potential for outcrossing to or from a particular crop, by considering, for example, appropriateness of buffer rows, environmental windbreaks, or land devoted to conservation;

- What options exist related to staggering planting times to help temporarily isolate a given crop from the potential of unintended outcrossing;
- What are cleaning and handling options for a particular crop that could help to minimize the potential for inadvertent commingling during planting, harvesting or cleaning activities, considering the use of planters, combines, seed storage bins, seed hopper/boxes, transportation vehicles, and other equipment pre- and post-harvest; and

- Understanding characteristics of applied technologies or pest management tools and the potential impact to different types of crops planted in the vicinity.

In today's agricultural marketplace, growers share common goals of increasing productivity and profitability, and through planning and proactive management measures, coexistence can help all growers meet their productivity goals and stewardship responsibilities while respecting their neighboring farming operations.

Seed Treatment Stewardship

Seed treatments, including fungicides, insecticides, nematicides, and amendments, play a critical role in agriculture and the production of a healthy crop. In addition to helping manage against early season pests and diseases, they serve as a viable alternative to foliar and soil applications.

Seed treatment management and responsible stewardship play a vital role in sustaining our environment while maximizing crop health. Responsible stewardship practices help maintain seed and seed treatment integrity, which keeps the active ingredient on the seed to achieve the maximum crop health benefit for the investment. In addition, these practices help minimize the

potential for adverse effects on producers and the environment, including pollinators, which may be present at the time of planting.

Additional best management practices can be found: <http://seed-treatment-guide.com/>

For a short video on treated seed stewardship, click here or type into your web browser the following: <https://www.youtube.com/watch?v=pGGviLUNagw>

Steps for Stewardship of Treated Seed

Follow Directions –

Follow directions on treated seed container labeling for handling, storage, planting and disposal practices.

Minimize Dust –

Use advanced seed flow lubricants that minimize dust.

Eliminate Weeds –

Eliminate flowering plants and weeds in and around the field prior to planting.

BeeAware –

At planting, be aware of honey bees and hives located near the field, and communicate with beekeepers when possible.

Clean and Remove –

Completely remove all treated seed left in containers and equipment used to handle harvested grain, and dispose of it properly. Keep all treated seed out of the commodity grain channels.

For detailed information about stewardship of treated seed, check out www.seed-treatment-guide.com

Corteva Agriscience TECHNOLOGY USE AGREEMENT

2024 Growing Season / U.S. TUA valid through December 2024

This Technology Use Agreement ("TUA") is entered into by Grower and Corteva Agriscience to set forth the terms and conditions upon which Grower shall use Seed containing Corteva Sourced Technology (including, but not limited to, germplasm and conventional seed products, and products such as Optimum® GLY herbicide tolerance, Enlist E3® soybeans, Grome® corn, etc.). All capitalized terms in this TUA shall have the meanings given to them in Article 1 below or as otherwise defined in the Agreement.

By signing below, the undersigned represents and agrees that: (1) he/she is eighteen (18) years of age or older; (2) he/she has read and understands the terms and conditions of the Agreement, including, without limitation, the terms and conditions set forth in the documents linked to this TUA via the hyperlinks provided below; (3) he/she is fully authorized to legally bind and to enter into the Agreement on behalf of the Grower identified in the Grower Information box below; and (4) the terms and conditions of the Agreement are legally binding on the Grower and all individuals and entities that will plant and grow crops from Seed on behalf of the undersigned and the Grower.

Opt In. Please check box to receive electronic communications from Corteva Agriscience.
Yes, I would like to receive agronomy advice, special offers, product information, news and updates through electronic communications from Corteva. By checking this box, I agree to receive automated marketing texts from Corteva at the phone number provided above. I understand consent is not a condition of purchase.

"Personal Information" means any information that identifies, is related to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular individual or where applicable, relates to an identifiable juristic person or legal entity.

"Pioneer" means Pioneer Hi-Bred International, Inc.

"Production Crop" means a crop the Grower produces for Corteva or a Corteva Licensee, utilizing Seed, pursuant to a valid Seed Production Agreement or similar agreement, which is controlled by Corteva or a Corteva Licensee.

"Purchased Seed" means Seed that is purchased by Grower from a Seed Seller under a fully executed TUA to which Grower and Corteva are parties, as amended pursuant to Update Notification(s), or otherwise.

"Representatives" means Corteva or Corteva Licensee representatives, agents, contractors and designees of any owner of Corteva Sourced Technology.

"Seed" means agricultural planting seed for all crops containing Corteva Sourced Technology, Enlist herbicides and/or intellectual property sold by Seed Sellers. Seed may contain Third-Party Trait Technology that is subject to such third-party's separate licensing arrangements.

"Seed Seller" means Corteva and those individual and entities authorized by Corteva to sell Seed.

"Seed Stock" means Seed that is owned by Corteva or a Corteva Licensee that is made available to a Grower to produce a single Production Crop.

"Third-Party Trait Technology" means proprietary trait technology from a technology provider other than Corteva.

"Update Notification" means a communication made to growers from time to time by Corteva with updated or new terms of the Agreement, which may include, without limitation, information regarding new and existing Corteva Sourced Technology, the patents licensed under the Agreement and any new or modified Agreement terms. Update Notifications will be distributed routinely and at Corteva's discretion.

2. LIMITED LICENSE:

2.1 Upon acceptance by Corteva of this TUA and for the term of the TUA, unaltered and duly executed by Grower, Grower is granted and hereby accepts, subject to the terms and conditions of the Agreement, a limited, non-transferable, revocable, non-exclusive, and non-sublicensable license by Corteva under the Licensed Rights solely to (i) purchase Seed from a Seed Seller or Corteva Licensee; and/or (ii) to plant Purchased Seed to produce a single commercial crop (or in the case that Purchased Seed is alfalfa, multiple commercial forage crops within a season or seasons) in the United States in a single growing season.

2.2 If Grower has entered into a current and valid seed production Agreement or similar agreement (collectively, referred to as "Seed Production Agreement") with Corteva or a Corteva Licensee, Grower is granted and hereby accepts, subject to the terms and conditions of the Agreement, a limited, non-transferable, revocable, non-exclusive, non-transferable, non-sublicensable license to plant Seed Stock to produce a single Production Crop in the United States provided that all such Production Crop is delivered to, or its disposition is controlled by, Corteva or the Corteva Licensee.

2.3 In addition to the foregoing, when Grower purchases or receives Seed or Seed Stock and/or plants Purchased Seed or Seed or Seed Stock containing Enlist® technology, Grower receives a limited license to use Enlist herbicides in conjunction with Enlist® crops grown from such Purchased Seed or Seed Stock. This limited, non-transferable, revocable, non-exclusive, and non-sublicensable license applies solely to Grower's activities in the United States and does not authorize Grower to plant Seed in the United States that has been purchased in or acquired from another country or to plant Seed in another country that has been purchased/acquired in the United States.

2.4 Corteva is a member of SIPA, and reports made on the SIPA tip line or via the website regarding Corteva products will be directed to our Commercial Compliance Team. If you suspect illegal use of Corteva traits or germplasm, reports can be made anonymously using the Industry Tip Line (1-844-SEED-TIP) or website (www.seedipalliance.com) which are hosted by an independent organization, the Seed Innovations Protection Alliance (SIPA).

PROHIBITED ACTIVITIES:

With respect to Corteva Sourced Technology, Grower acknowledges and agrees that Grower is NOT permitted to do any of the following and should Grower, or someone on Grower's behalf, perform any of the activities listed below, shall result in Grower being in breach of this TUA:

1. DEFINITIONS: Each of the following terms shall have the meaning specified below:
"Agreement" means, as of any date of determination, (i) this TUA; (ii) the then-current Guide(s); (iii) the then-current Update Notification(s); and (iii) the terms of the Delivery Ticket, all of which are incorporated herein and deemed a material part of the Agreement.
"Claim(s)" means any completed, actual, pending or threatened claim, action, suit, demand, or proceeding, whether in law or equity and whether civil, criminal, administrative or investigative (including any action by governmental authorities).
"Colex-D® Technology" means a Corteva-proprietary herbicide technology package comprised of 2,4-D choline, advanced formulation science and innovative manufacturing processes, which is specifically designed to provide ultra-low volatility, minimized potential for physical drift, decreased odor and improved handling characteristics.
"Corteva" and **"Corteva Agriscience"** means, collectively, Corteva Agriscience LLC, Pioneer Hi-Bred International, Inc., Corteva Agriscience MCS, LLC, PhytoGen Seed Company, LLC and their parents, affiliates and subsidiaries.
"Corteva Sourced Technology" means proprietary germplasm and all current and future seed trait technology as set forth in applicable Update Notification(s). Corteva Sourced Technology currently covered as Licensed Rights by this TUA includes, but is not limited to, the patents listed in Update Notification(s) provided at the time of execution of this TUA or thereafter.
"Delivery Ticket" means the document signed by Grower upon each delivery of Purchased Seed.
"Enlist® herbicides" means agricultural products that contain 2,4-D choline herbicide featuring Colex-D Technology.
"Grain" means material utilized for food, feed, and/or fuel and not planted/propagated in the future.
"Grower" means all individuals and/or entities associated with the farming operation identified in the applicable Grower Information box above.
"Guide" mean the Product Use Guide document(s) published and updated by Corteva from time to time that specify, among other things, stewardship management practices for Seed, Enlist herbicides and Corteva Sourced Technology.
"Licensed Rights" means all patent claims (registered and unregistered), trade secrets, rights existing under the US Plant Variety Protection Act (or its foreign equivalents) and other intellectual property rights relating to Corteva Sourced Technology or Enlist herbicide that are reasonably necessary for a Grower's exercise of the limited license granted under Article 2 below with respect to Purchased Seed or Seed Stock. The Licensed Rights as of any date of determination are set forth in the current Update Notification.
"Licensee" means an entity that has a valid, active agreement with Corteva granting such entity a license to produce and sell Corteva seed trait technology in its seed products.
"Loss(es)" means all damages, losses, awards, judgments, settlements, assessments, liabilities, taxes, levies, penalties, fines, charges, costs and expenses (including any court costs and reasonable legal and professional fees and expenses, including in investigating and preparing for litigation or proceeding) and any other payments.
"Patents" means Corteva patents, registered and unregistered, held in the United States and/or Canada.

For further information or to view the current Technology Use Agreement, Update Notification or a Product Use Guide, go to www.traitstewardship.com or contact Corteva Agriscience at 1-800-258-3033.

Revision date: June 2023 / U.S. TUA

Copyright © 2022 Corteva Agriscience. All Rights Reserved.

PROHIBITED ACTIVITIES continued:

- supply, sell, transfer, license, sublicense or otherwise distribute any Seed, Seed Stock, or Corvea Sourced Technology to any other person, entity or other third-party for planting or any other purposes;
- accept any Seed or Seed Stock from any third-party other than a Seed Seller, Corvea, or a Corvea Licensee;
- save, clean or use any crop produced from Seed for planting and/or supply crop produced from Seed to anyone for planting. The planting of any crop produced from Seed is not licensed and shall constitute infringement of Corvea's Patents, unless specifically permitted by a written agreement with Corvea or a Corvea Licensee;
- plant Seed for seed production unless and only if, Grower has entered into a valid, written Seed Production Agreement or similar agreement with Corvea or a Corvea Licensee, which requires Grower to physically deliver the resulting crop either to Corvea or the Corvea Licensee;
- sell for non-seed purposes or use for non-seed purposes all of the Seed produced;
- purchase or otherwise obtain from Corvea or the Corvea Licensee any of the Seed produced unless, after physical delivery by Grower to Corvea or the Corvea Licensee, the Seed has been conditioned, packaged and delivered by Corvea or the Corvea Licensee to Grower in the same manner as Seed sold by Corvea or the Corvea Licensee to growers who have not entered into a Seed Production Agreement; and/or
- use or allow others to use Seed, plant any Seed or use any crop or plant material produced from Seed, for crop breeding, research, or generation of herbicide or other regulatory registration data. Grower may not conduct research on Grower's crop produced from Seed.

In addition to the above Prohibited Activities, and with respect to Enlist® crops and herbicide use on those crops, Grower acknowledges and agrees:

- the Grower is NOT permitted to use any pyridyloxy-carboxylate herbicides (e.g., triclopyr, fluroxypyr) on Enlist E3 soybean or Enlist® cotton crops for spring burn-down, pre-plant, pre-emergence or post emergence application, unless the product is expressly labeled for use on Enlist E3 soybean or Enlist cotton;
- following burn-down (including pre-emergence use), Grower is NOT permitted to use any phenoxy-carboxylate herbicide-containing product (e.g., containing 2,4-D, 2,4-DB, MCPA, dichlorprop, LV6, MCPB, mecoprop), which is NOT expressly labeled for use in conjunction with Enlist crops and does not contain 2,4-D choline with Colex-D technology; and/or
- following burn-down, Grower is NOT permitted to use any aryloxyphenoxy-propionates (AOPP) herbicides (e.g., quizalofop, cyhalofop, diclofop, fenoxaprop, fluazifop) on emerged Enlist® corn, unless the product is expressly labeled for use in conjunction with Enlist corn;

Should Grower, or someone on Grower's behalf, perform any of the activities listed above, they shall be in breach of this TUA.

Grower further acknowledges and agrees that the limited license(s) granted herein do not convey or otherwise transfer any ownership rights of Corvea Sourced Technology or Enlist® herbicides to Grower.

3. UPDATES AND DOCUMENTS THAT ARE PART OF THIS AGREEMENT:

- Each Update Notification is hereby incorporated into this TUA and deemed a material part of the Agreement once posted on www.traitstewardship.com. For so long as Grower has a valid TUA in effect with Corvea, Corvea will provide notice of Update Notifications to Grower to the email address or physical address provided by Grower in the Grower information box above.
- Current Guides are available from Seed Sellers, from Corvea directly and on www.traitstewardship.com.
- Until this TUA is terminated or superseded as set out in Article 5, the terms and conditions of use set forth on the packaging, container or label (including bagtags) (collectively, "Label Terms") of Purchased Seed and terms and conditions of the Delivery Ticket are hereby incorporated herein and deemed a material part of the Agreement.
- Grower acknowledges and agrees that updates of the Agreement, any Update Notification and any Guide published from time to time by Corvea are incorporated herein and deemed a material part of the Agreement once posted on www.traitstewardship.com.
- Grower's use of Seed after Corvea posts an update on www.traitstewardship.com which updates this TUA, the Agreement, an Update Notification or a Guide, or a new Update Notification or a new Guide, constitutes Grower's acceptance of and agreement to be bound by the provisions of such updated or new documents.
- Inconsistencies among (i) the Update Notification, (ii) the TUA; (iii) relevant Guide(s), each as posted on www.traitstewardship.com at the time Grower opens a bag or container of Seed for planting; and (iv) Label Terms, shall be resolved in the following order: first, in favor of the Update Notification, second, the TUA, third, the Guide(s) and fourth the Label Terms.

4. STEWARDSHIP AND COMPLIANCE:

- Grower agrees to read and follow all applicable laws and regulations, all applicable Guides, the terms of the Delivery Ticket, and the Label Terms associated with Corvea Sourced Technology and Enlist herbicides. Grower agrees to follow the best management practices, recommendations and guidelines provided in all applicable Guides.
- Grower agrees to read and follow all Insect Resistance Management ("IRM") requirements set forth in the Guide, including any requirements to establish and maintain a refuge. Failure to follow IRM requirements may result in loss of access to insect protected hybrids for at least one year.
- Grower acknowledges that modification, revocation or cancellation of regulatory authorizations and/or registrations including, but not limited to, biotech or other trait(s), enabling technologies and/or enabled pesticide, herbicide or fungicide product(s) by local, state, federal, or foreign regulatory agencies may occur and are outside the control of Corvea. Grower agrees to always read and follow directions for use on pesticide, insecticide, fungicide or herbicide labeling as set forth in the Guide. Grower acknowledges and agrees to Grower's obligation to follow and adhere to any such modifications, revocations or cancellations. Grower further understands that regulatory status and available supplies of a biotech trait(s) and/or pesticide product may limit its availability for use in a particular growing season and/or the marketability of the resulting Grain crop.
- Grower acknowledges and agrees that, following burn-down, the only 2,4-D-containing herbicide products that can be used with Enlist crops are products containing Colex-D Technology and are expressly labeled for use on Enlist crops.
- Grower agrees to follow Herbicide Resistance Management ("HRM") practices, such as pre-and post-application field scouting and reporting. Lack of herbicide efficacy must immediately be reported to Corvea.
- Grower agrees to provide Grower's reasonable cooperation to Corvea and the Representatives in connection with their efforts to verify Grower's compliance with stewardship, IRM, HRM and other requirements of the Agreement, including, but not limited to, completing written and oral questionnaires and cooperating with Corvea and third-party on-farm IRM compliance assessments.
- Corvea is a member of Excellence Through Stewardship® ("ETS"). Corvea Seed products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with Corvea's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Any crop or material covered by the Agreement including, but not limited to, proprietary plant varieties and/or hybrid products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers must talk to their Grain handler or product purchaser to confirm their buying position for these products and Grower shall direct crops, Grain, or material produced from Seed only to appropriate markets. Any crops, Grain, or material produced from Seed can only be exported to, or used, processed, or sold in countries where all necessary regulatory approvals have been granted. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.
- Grower will provide information, as reasonably requested by Corvea, Seed Sellers or Representatives, including, without limitation, USDA Farm Service Agency crop reporting information, Form 578 and corresponding aerial photographs, for the sole purpose to verify compliance with the Agreement (including, without limitation, the license grant, stewardship, IRM, HRM and other requirements).
- In addition, upon request by Corvea, Seed Sellers or Representatives, Grower shall furnish copies of invoices and other relevant documents related to Grower's purchases of Seed and chemical transactions and Grower also agrees to disclose to Corvea, Seed Sellers and/or Representatives certain information, including the locations of all fields, to confirm compliance with the Agreement following Corvea's actual (or attempted) oral communication with Grower and not later than seven (7) days after the date of a written request from Corvea, including the locations of all fields planted with crops containing Corvea Sourced Technology or where Enlist herbicide as applied, the identities of all herbicides applied to these fields and other data as specified in the Guide(s).
- As Grower is claiming a tax exemption for the Purchased Seed, Grower hereby represents and warrants that: (i) Grower is in the business of agricultural production; (ii) the Purchased Seed will be used solely for agricultural production; and, (iii) due to the foregoing, Grower qualifies for a tax exemption, under applicable state tax laws, for the Purchased Seed. Grower agrees to provide tax exemption certificates as reasonably requested by Corvea or Seed Sellers.

5. PRIVACY

5.1 Grower hereby consents to the collection, use and disclosure of Grower's Personal Information by and between: (i) Corvea; (ii) retailers, including but not limited to Seed Sellers, from which Grower purchases Corvea products; (iii) Corvea partners and service providers for the purpose of administering Corvea offers, including validation of product purchases and calculation/issuance of rebates and rewards, marketing, surveys, direct mail, digital and social media communication and to improve and modify our products and to personalize services; and (iv) Corvea partners and service providers for purposes of conducting on-farm IRM or other compliance assessments. Corvea wants the Grower to be familiar with how Corvea collects, uses and discloses information. Any information collected from this TUA, the Agreement, through the provision of services or products, or through Corvea websites or mobile applications generally will be handled in accordance with the Corvea Privacy Statement accessible at <https://www.corvea.com/privacy.html>; and for United States residents in accordance with the United States Privacy Notice, accessible at <https://www.corvea.com/us-privacy-rights.html>. In addition, the California Notice at Collection is accessible at https://www.corvea.com/us-privacy-rights.html#NoticeCollection_25. By providing Personal Information to Corvea, Grower agrees to the terms and conditions of the Privacy Statement. Different Corvea websites and mobile applications have different purposes, uses and features, consequently, a specific privacy disclosure or statement may apply and each such privacy disclosure or statement supplements and amends the Corvea Privacy Statement.

6. TERM AND TERMINATION:

6.1 Excepting those provisions that by their nature need to survive termination of this TUA in order to effectuate their purpose, this TUA, once signed by Grower and accepted by Corvea, will remain in effect until terminated or superseded. Grower or

Corvea may terminate this TUA at any time and for any reason by at least thirty (30) days (or one hundred eighty (180) days in Minnesota or ninety (90) days in Wisconsin) written notice of termination to the other party at the address specified in section A, B or D above.

6.2 In addition to the foregoing, Corvea reserves the right to revoke Grower's right to use any Corvea Sourced Technologies and Enlist herbicides upon at least thirty (30) days (or one hundred eighty (180) days in Minnesota or ninety (90) days in Wisconsin) written notice to the Grower. All license grants granted pursuant to this TUA shall automatically terminate upon the termination of this TUA, without the need for further notice or action. In the case of termination by Grower, such notice of termination must include Grower's full legal name, address and license number. Upon termination of this TUA or a license granted hereunder with respect to any Corvea Sourced Technology and Enlist herbicides for any reason, (i) Grower shall terminate the use of all Seeds containing the particular Corvea Sourced Technology or Enlist herbicides, which may require destruction; (ii) Grower shall return unused Seeds containing such Corvea Sourced Technology to Corvea at Grower's cost; and (iii) Grower will no longer have a right to purchase or use Seed containing such Corvea Sourced Technology or Enlist herbicide. Notwithstanding the foregoing, Grower's obligations and Corvea's rights that arose under this Agreement prior to termination will continue in effect.

7. CORVEA SOURCED TECHNOLOGY FEES:

7.1 Grower agrees to pay a designated Corvea entity or Corvea Licensee all applicable fees that are a part of, associated with or collected with the purchase and use of any Seed and/or Corvea Sourced Technology or Enlist herbicide through Corvea's payment terms then in effect. Corvea reserves the right to change from time to time the amount of and how it charges Corvea Sourced Technology or Enlist herbicide fees. Grower shall pay interest to Corvea on any past-due fees at the rate of 1.5% per month (18% per annum) or the maximum amount permitted by law, whichever is less, from the applicable due date for such fees until paid. Any payments received by Corvea may be applied to unpaid fees, interest or other charges in Corvea's discretion.

8. PRODUCT DESCRIPTION EXPRESS WARRANTY:

8.1 Corvea warrants that the Purchased Seed conforms to the written description(s) on the label, package, bag, tag or container within tolerances, if any, established by law, when used in accordance with the applicable directions and in compliance with the Agreement.

9. DISCLAIMER OF WARRANTY:

9.1 TO THE EXTENT ALLOWABLE BY LAW, THE EXPRESS WARRANTY ABOVE EXCLUDES, AND IS IN LIEU OF, ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE INCLUDING ANY WARRANTY OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. All applicable warranties are contingent upon the proper use in the application for which the Seed was intended and does not cover Seed which has been modified in any manner (including, but not limited to, insecticide or fungicide seed treatment, in-furrow fertilizers, biologicals or micronutrient products of any kind not provided directly by or otherwise approved by Corvea) or which have been subjected to improper storage, abuse, misuse, alteration or neglect. CORVEA DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING ANY SEED OR PRODUCT NOT COVERED BY THIS TUA ("THIRD-PARTY PRODUCT"), INCLUDING, BUT NOT LIMITED TO, THIRD-PARTY PRODUCT THAT IS LABELED FOR USE ON PIONEER BRAND SEED OR OTHER CORVEA AGRISCIENCE PRODUCTS. CORVEA SPECIFICALLY DISCLAIMS ALL RESPONSIBILITY FOR THE USE OF THIRD-PARTY PRODUCT WITH PIONEER BRAND SEED OR OTHER CORVEA AGRISCIENCE PRODUCTS. ALL QUESTIONS AND COMPLAINTS ARISING FROM THE USE OF THIRD-PARTY PRODUCT SHOULD BE DIRECTED TO THE COMPANIES PROVIDING OR PRODUCING SUCH THIRD-PARTY PRODUCT. ANY REPRESENTATION OR WARRANTY RELATED TO ANY CORVEA PESTICIDE PRODUCT IS LIMITED SOLELY TO ANY REPRESENTATIONS OR WARRANTIES MADE AS PART OF THE SALE OF SUCH CORVEA PESTICIDE PRODUCT.

10. LIMITATION OF LIABILITY AND PROMPT NOTICE OF CLAIM:

10.1 GROWER'S EXCLUSIVE REMEDY FOR ANY CLAIM OR LOSS (INCLUDING, WITHOUT LIMITATION, CLAIMS ALLEGING BREACH OF WARRANTY, CONTRACT, TORT, STRICT LIABILITY, INFRINGEMENT OR NEGLIGENCE), SHALL BE LIMITED SOLELY AND EXCLUSIVELY TO (i) REPAYMENT OF THE AMOUNT OF THE PURCHASE PRICE OF THE APPLICABLE SEED, OR (ii) REPLACEMENT OF THE AFFECTED SEED, AT THE ELECTION OF CORVEA AND ITS APPLICABLE SEED SELLER. CORVEA SHALL BEAR NO LIABILITY FOR LOSS OF OR DAMAGE TO SEED AFTER SEED HAS BEEN DELIVERED TO THE PARTY PURCHASING THE SEED. For clarity, Corvea shall not indemnify Grower for Grower's (or any other person's) not acting on behalf of Corvea) negligence, violation of the Agreement, violation of any law or regulation or any other Losses or any other outcomes resulting from Grower's or Grower's employees, contractor's, or agent's decisions, actions or failure to act.

10.2 IN NO EVENT SHALL CORVEA, ITS SEED SELLERS OR LICENSEES BE LIABLE FOR ANY INDIRECT, INCIDENTAL SPECIAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE SEED OR OTHER CORVEA PRODUCT. CORVEA DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED AND MAKES NO STATEMENT WITH RESPECT TO THE ONGOING OR FUTURE REGULATORY STATUS, ACCEPTABILITY, SUPPLY OR AVAILABILITY OF A BIOTECH TRAIT OR TRAIT STACK, INSECTICIDE, FUNGICIDE OR HERBICIDE PRODUCT COMPATIBLE WITH THE SEED, OR, IN EACH CASE, CONTAINED IN THE SEED. THESE TERMS ARE INDEPENDENT OF THE REGULATORY STATUS OF ANY TECHNOLOGY CONTAINED IN, OR SEED FOR USE WITH, THE SEED, INCLUDING PESTICIDE PRODUCTS.

10.3 Because Corvea must have sufficient time to investigate any Claim regarding the performance or non-performance of the Seed, no Claim can be asserted against Corvea unless Grower gives notice to Corvea within fifteen (15) days after Grower first observes or has knowledge of indications that the performance of the Seed may be subject to a valid warranty Claim, is not as warranted.

11. RIGHT OF ENTRY:

11.1 For the term of this TUA and for one year following its termination, Grower hereby grants Corvea, the Representatives and their respective employees, contractors, subcontractors, agents and designees (collectively, "Personnel"), the complete and unencumbered right, at all times, to (i) observe and/or take video and/or pictures of the crop or Seed, farming activities, spray or other applications, and harvesting activities; and/or (ii) enter upon and have reasonable ingress to and egress from, through, over, under, across and across the property where Grower has planted or is storing or growing Seed as well as having similar access to any refuge area and bins, wagons, tractor trailers or seed storage containers for purposes of data collection, field and crop inspection, testing and examining the land and Grower's crop and taking samples of soil, crops, crop residue or seeds located thereon. Such collection, inspection, examination, testing or sampling shall be performed by Personnel only after Corvea or the Representatives deliver in writing to Grower written notification of the Personnel's visit at least three (3) days in advance and Corvea or the Representative also have reasonably attempted to discuss the visits with Grower in advance of such visits. Grower agrees that such ingress and egress may be made by means of roadways and driveways, to be used in common with others having right of passage thereon. If Grower is not the owner of premises where such access is needed, Grower shall be solely responsible for obtaining consent from the applicable landowner for the visit.

11.2 To the extent of Personnel's negligent acts or omissions arising out of or in connection with this Article 10, Corvea indemnification of Grower shall be limited to Losses to the applicable Seed crop fields, commercial crop fields or personal property.

12. ADDITIONAL PROVISIONS:

- Grower agrees to communicate all applicable terms, conditions and restrictions on Seed whether under this Agreement, a Guide, an Update Notification or otherwise to all persons and entities possessing or taking an interest in Grower's Seed and Grain therefrom.
- Except as provided herein, notices to Grower or to Corvea shall be sent to the addresses specified in sections A, B or D above.
- Grower agrees that should any information provided to Corvea herein change, Grower will promptly notify Corvea via section D above.
- Nothing in the Agreement shall be construed as a grant or license from Corvea to the Grower for the use of any Corvea trademark. Grower is required to enter a separate trademark license from Corvea to use any Corvea trademark(s) including, but not limited to, those marks associated with trait, seed, technology or products.
- Grower's rights under the Agreement may not be transferred or assigned to any other person, entity or third-party without the prior written consent of Corvea.
- The Agreement (including documents and updates incorporated herein pursuant to Article 3 hereof) constitutes the entire agreement between Grower and Corvea regarding the use of Purchased Seed, Enlist herbicide and Corvea Sourced Technology. All prior agreements and understandings between Grower and Corvea with respect to Purchased Seed, Enlist herbicide and Corvea Sourced Technology are hereby superseded.
- If any provision in the Agreement is determined to be void or unenforceable, the remaining provisions shall remain in full force and effect.
- The failure of Corvea or any Third-Party Technology providers to exercise one or more of its rights under the Agreement on one or more occasions shall not be deemed a waiver to exercise such right(s) on one or more subsequent occasions.
- This TUA may be executed and delivered by electronic signature (including portable document format) by Grower and Corvea may rely on the receipt of such document so executed and delivered electronically as if the original had been received.
- Any action against Corvea and its Seed Sellers for the breach of the terms of the Agreement, including any warranties arising from it, must be commenced within one year after the cause of action accrues or be barred after such time. Where applicable, all required prerequisites to maintaining a legal action must be complied with prior to initiating the legal action.
- No class actions: Any dispute arising out of or relating to the Agreement may only be brought on an individual basis and may not be resolved on behalf of a class, as a private attorney-general, or in any other representative capacity. Grower shall not participate in or collect payment as a result of any class, collective, or other representative action of any kind against Corvea.
- Jurisdiction and Governing Law: The interpretation and enforcement of the Agreement shall be governed by the laws of the State of Iowa without regard to its choice of law provisions. THE PARTIES CONSENT TO THE SOLE AND EXCLUSIVE JURISDICTION AND VENUE OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, CENTRAL DIVISION AND THE DISTRICT COURT OF THE COUNTY OF POLK, IOWA, FOR ALL CLAIMS AND DISPUTES ARISING OUT OF OR CONNECTED IN ANY WAY WITH THIS AGREEMENT AND/OR THE USE OF THE SEED OR THE TECHNOLOGY. THE PARTIES WAIVE ANY OBJECTION TO VENUE IN THE CENTRAL DIVISION OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, INCLUDING THOSE BASED, IN WHOLE OR IN PART, ON THE DIVISIONAL VENUE LOCAL RULE(S) OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA.
- Grower and Corvea unconditionally waive any right to trial by jury in any action, proceeding or counterclaim in any way arising out of, or relating to, the Agreement.
- Enforcement Costs: Grower agrees that Corvea and any owners of the patents covered by the Agreement shall be entitled to recover any costs or expenses, including, but not limited to, court costs or reasonable attorneys' fees, it incurs in enforcing its rights under the Agreement if the Grower is determined to be at fault.

Notes

Always follow grain marketing, stewardship practices and pesticide label directions in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions.

Roundup® Ready is a registered trademark of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitsstewardship.com. Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions. Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products

are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Corteva Agriscience (or its chemical company partners) shall have no liability whatsoever for any losses or damages resulting from, or related to, or in connection with, (a) the use of incorrect herbicides applied to cotton products that contain the herbicide tolerant traits or (b) non-compliance with any of the other instructions set forth above, and all such liability is hereby expressly disclaimed by Corteva Agriscience and waived by you. If you have any questions on anything outlined in this document or would like additional information please contact your local sales professional.

Corteva, Inc. (NYSE: CTVA) is a publicly traded, global pure-play agriculture company that combines industry-leading innovations, high-touch customer engagement and operational execution to profitably deliver solutions for the world's most pressing agriculture challenges. Corteva generates advantaged market preference through its unique distribution strategy, together with its balanced and globally diverse mix of seed, crop protection, and digital products and services. With some of the most recognized brands in agriculture and a technology pipeline well positioned to drive growth, the company is committed to maximizing productivity for farmers, while working with stakeholders throughout the food system as it fulfills its promise to enrich the lives of those who produce and those who consume, ensuring progress for generations to come.
