

One-Pass Postemergence Recommendation

DuPont™ Realm[®] Q herbicide delivers:

- The flexibility to work in more diverse weather, across more hybrids
- A wide window of application to start early (row & go timing) and still control later-emerging weeds
- Control of waterhemp, lambsquarters and other glyphosate- or ALS-tolerant weeds
- Ease of handling in a convenient dry formulation

Application information

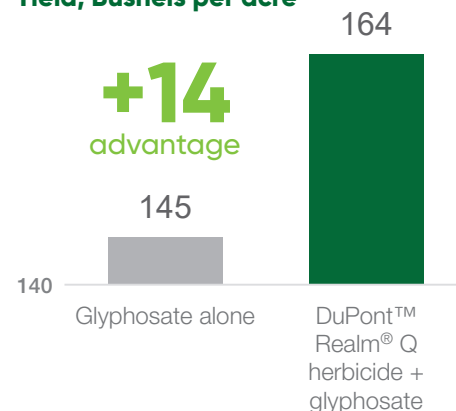

- While Realm[®] Q has a wide application window, research has shown best results are obtained when applications are made early postemergence (row & go), when corn and weeds are small
- Make postemergence applications of Realm[®] Q to field corn that is up to 20 inches tall, or up to and including six-leaf collars

Convenient dry formulation

Realm[®] Q is formulated using a proprietary blend technology that provides you with:

- Easy-to-handle dry-flowable formulation
- Faster pourability and bottle cleanout
- One of the few dry mesotrione formulations on the market

Yield, Bushels per acre

Source: DuPont field trial; trial conducted with university cooperators and third-party researchers across 20 states, 2004-2007

Yield advantage (DuPont™ Q Product formulations + glyphosate): DuPont data collected from 22 university cooperators and third-party researchers has shown on average a 14 bu/A advantage by tank mixing an additional mode of action to glyphosate that also offers residual control, such as Realm[®] Q.

Two-Pass Recommendation

DuPont™ Realm[®] Q herbicide 4.0 oz/A

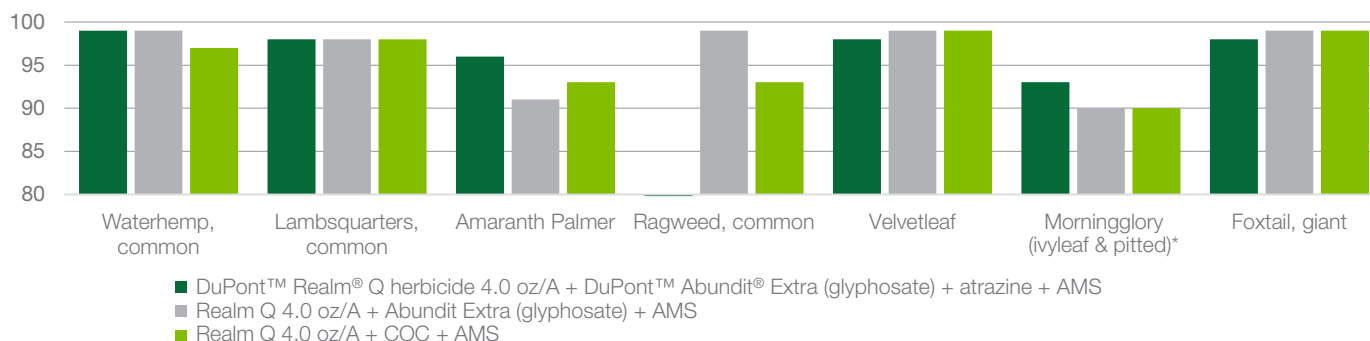

+ DuPont™ Abundit[®] Edge* herbicide (glyphosate) or Durango[®] DMA[®] herbicide (for use on glyphosate-tolerant crops only)

+/- Atrazine

*Refer to the Abundit Edge or Durango DMA label for specific AMS and surfactant recommendations.
